

Elevate your workflows with one secure platform

BUSINESS BENEFITS

- Ease of use for productive workflows
- Out-of-the-box value in seconds with no training required
- Highest safety protocols with end-to-end encryption & zero knowledge
- One integrated workspace for document management
- Granular user control
- Data residency options
- Compliance with regulations and industry standards
- Custom branding

Say goodbye to complicated tools. Tresorit's scalable platform supports the use cases you need. Efficient, secure, compliant: out-of-the-box.

Discover three powerful use cases to elevate your business and turn digital trust into your business advantage.

We believe that professionals in all organizations should have a secure and easy way to collaborate with their sensitive and confidential information.

We provide a platform for departments, teams and solo entrepreneurs, equipping them with secure solutions to engage efficiently with their coworkers, customers, and other organizations.

CLIENT DATA ROOM

Exchange information securely with your customers in an end-to-end encrypted client data room.

Empower your business by using a client data room, a secure and centralized platform tailored for seamless collaboration and confidential information sharing.

- Securely share or request any file assigning varying degrees of access to different users within your client base
- Easily onboard clients by automating processes & ensuring brand consistency via custom branding
- Digitally sign and collaborate on documents from anywhere, on any kind of device

 Almere,
The Netherlands

 IT Consultancy  50

Secwatch, a leading Dutch cybersecurity firm, sought a solution to safeguard sensitive client data. A decisive factor was the ability to set up virtual data rooms with very few mouse-clicks. This enables the IT specialists to create a secure vault, allowing users to store, share and collaborate on sensitive data with ease.

Challenges solved:

- ✓ Clean separation of client data in secure data rooms
- ✓ Productivity without compromising security
- ✓ Compliance with stringent legal requirements

“With Tresorit we can separate data in highly secured data rooms without losing our ability to work productively. Our clients value our commitment to safeguarding their digital assets and that gives us a competitive advantage.”

— Henk-Jan Angerman, CVO at Secwatch

PARTNER DATA ROOM

Expand your business relationships within a secure partner data room.

Maintain complete control over your data and access permissions when inviting partners, consultants, auditors, and suppliers to collaborate with your company.

- Authorize specific partners to access, view, download, and collaborate on designated files or folders from any device, anywhere and anytime
- Comply with stringent regulations and industry standards such as ISO-27001, HIPAA, TISAX, Common Criteria without sacrificing efficient collaboration with your partners
- Protect your business reputation by preserving the confidentiality of your business partners' data

TRADE
REPUBLIC

Berlin,
Germany

Fintech

700

Trade Republic uses Tresorit to securely exchange sensitive financial documents with external partners and regulatory authorities. With robust security features and customizable access controls, Trade Republic maintains control over critical data while streamlining workflows for enhanced efficiency.

Challenges solved:

- ✓ Protection of large amounts of sensitive data
- ✓ Secure file exchange with external partners
- ✓ Complete fit with audits and compliance checks

"We create folders for external partners to access certain info, and we want to make sure that this information is always available to them. But we also need to know what happens to it. That's where the tracking features that Tresorit provides are very handy."

— Raza Perez, Strategic Operations Lead
at Trade Republic

BUSINESS FILE SHARING & STORAGE

Accelerate your daily operations by managing documents with a flexible and easy-to-use platform.

Store, collaborate and share your most sensitive corporate information assets in confidence with only selected internal employees or with your external partners and customers.

- Seamlessly integrate with the tools supporting your workflows such as Gmail, Outlook, OKTA, and Sentinel
- Safeguard your documents against alterations or unauthorized modifications by applying dynamic watermarks
- Gain total control over user, file, and access management with granular permissions, activity logging, and audit trails

Food Tech

50

Plant-based food company NotCo utilizes Tresorit for encrypted file sharing among its international R&D team and external partners. Tresorit enables efficient collaboration and tracking of secret formulas, enhancing productivity and maintaining confidentiality in its innovative food tech endeavors.

Challenges solved:

- ✓ Protection of confidential IP with built-in end-to-end encryption
- ✓ Quick, reliable, and secure file storage with cloud access
- ✓ User-friendly collaboration with internal and external teams

“At NotCo, we’re in business to reinvent the food industry through the power of AI. The R&D team I’m part of handles a part of the company’s intellectual property, and Tresorit lets us collaborate efficiently and securely on that confidential data with colleagues all over the globe.”

— Julia Berning, Food Scientist
