We have a vision

Our vision at Tresorit is **to empower organizations to secure their digital assets, collaborate on sensitive data, and be more efficient** thanks to smooth workflows.
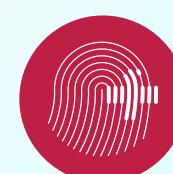

We provide an **extremely user-friendly and highly secure solution** that exceeds the highest standards of privacy and security, based on the Zero Knowledge principle and end-to-end encryption, featuring file sharing, email encryption, and digital signatures.

By seamlessly integrating with Microsoft Office 365, we aim to **provide organizations with the additional layer of security** they need to work with their preferred productivity tools while keeping their data secure.

The Tresorit advantage

It's the **combination of Zero Knowledge security with ease-of-use** in all typical business workflows that adds the additional layer of security you deserve.

- **True End-to-end encryption**

- **User-friendly interface**

- **Collaboration features around file sharing, signing, email encryption**

- **Compliance with all major regulations**

- **Granular access control**

- **Desktop applications for Windows, Mac & Linux**

- **Android & iOS Apps & Web access**

Already trusted by more than 12,000 businesses

Tresorit's **end-to-end encryption, granular access control, and compliance with regulations such as TISAX, HIPAA, ITAR and GDPR make it a popular choice for companies** that handle sensitive information. Currently more than 100,000 users benefit from its user-friendly interface and collaboration features.

Tresorit is **used by global and leading businesses who prioritize security and privacy** when sharing and collaborating on files. Many of our clients work in highly regulated industries in the **legal, healthcare, financial and technology sector among others.**
